

## *Preface*

**T**he current publication for the Last quarter of 2016 (October-December) is the 1<sup>st</sup> series of the New Consumer Price Index (CPI) for Rural, Urban and Combined using the base year 2010=100 published on quarterly basis by the Directorate of Economics & Statistics, Nagaland. The Department has done away with the old CPI of Urban Non-Manual Employee (UNME) using the base year 1981-82=100. This publication includes price data on relative movement of retail and wholesale prices of consumer goods, non-consumer goods, building materials and Consumer Price Index.

Consumer Price Index (CPI) measures the relative change of price of a fixed set of goods and services consumed by a defined set of families in a particular area with reference to the base year. It is a useful tool in generating and adjusting real wages and salaries, taxation, price policy, and other economic policies.

Basing on the National Sample Survey (NSS) 66th Round State Report for the Consumer Households Expenditure survey, the weighting Diagram for CPI Rural, Urban and Combined has been derived. Altogether 105 items in rural sector, 130 items in urban sector and 131 items in combined sector are included in the weighting diagram. Under the New series, the prices of 238 items (both weighted and unweighted) are being collected from all the 11 districts covering 11 urban price centres and 22 rural price centres. The wholesale prices are collected from the Dimapur Urban centre.

It is our hope that the data contained in this report will be helpful for Policy Makers, Planners, Administrators and Researchers. I look forward suggestions for further improvement of this publication.

# Concepts & Definitions

## Introduction

**I**n the economic development of a Country or State, Price plays a very significant role. Price is the prime mover of the wheels of the economy namely, production, consumption, distribution and exchange. Price affects the living standards of the society, regulates business profits and allocates the resources for the optimum output and distribution. Thus, it acts as a powerful agent of sustained economic development.

### **PRICE:**

Price is the quantity of payment or compensation given by one party to another in return for goods and services. In simple terms, price is nothing but the cost or value of the product.

### **CONSUMER'S PRICE:**

Consumer's price is the amount paid by the consumer in the exchange of goods and services. The rate at which the consumers purchases goods and services is called consumer's price.

### **WHOLESALE PRICE:**

Wholesale price is the rate at which a commodity is sold to the sellers or distributors in large transaction.

### **SUBSIDIZED PRICE:**

A price for a product that is reduced because the government has paid part of the cost of producing it.

### **CONSUMER:**

A consumer is a person or organization that uses economic services or commodities. The consumer is the one who pays something to consume goods and services produced.

### **GOODS:**

Goods are materials that satisfy human wants and provide utility.

### **SERVICE:**

A service is a transaction in which no physical goods are transferred from the seller to the buyer. Services are by definition intangible.

### **CONSUMER PRICE INDEX:**

Consumer price index (CPI) measures changes over time in the price level of consumer goods and services purchased by households. CPI numbers are widely used as a macroeconomic indicator of inflation, fixing salary and

dearness allowance of the employees, used for monitoring price stability and also inflators/deflators in the national accounts estimates.

**WEIGHT:**

Weight represent expenditure on specific good (s) or service (s) as percentage/proportion of the total consumption expenditure of all goods and services included in the consumption basket for the target group during the reference period/ base period. In other words weight is nothing but the relative importance of goods and services consumed by a target group during the reference period.

**WEIGHTING DIAGRAM:**

The whole structure of weight is known as the ‘Weighting Diagram’. Weight distribution is prepared by building it up “from below” methods, i.e., add up the shares of each items within a sub group, then subgroup shares into major shares and then add up to arrive at “all commodities” normalized to 100. In other sense, all item in the index basket at individual level, sub level, group level and general level were given weight and normalized to 100 at each level.

**IMPUTATION :**

Item with lesser value in the expenditure distribution is imputed at item level having homogeneity and complementary effects, then impute in sub group and then at group level respectively.

**BASE YEAR:**

Base year is the beginning or the reference year for constructing an index. A base year is normally set to an arbitrary level of 100.

**CURRENT YEAR:**

The year in which the latest/current estimation is prepared.

**PRICE COLLECTION SYSTEM IN NAGALAND:**

The Department of Economics and Statistics (DES) collects price data from all the 11 districts in the State. At the Directorate level, the price data are been analyzed, verified, estimated and published. In the District, the District Statistical Officer and its staff collects retail price data of 238 items on weekly basis covering 11 urban price centres and 22 rural price centres. Wholesale prices are collected from the Dimapur urban centre.
